

CS STARS Take A Tour

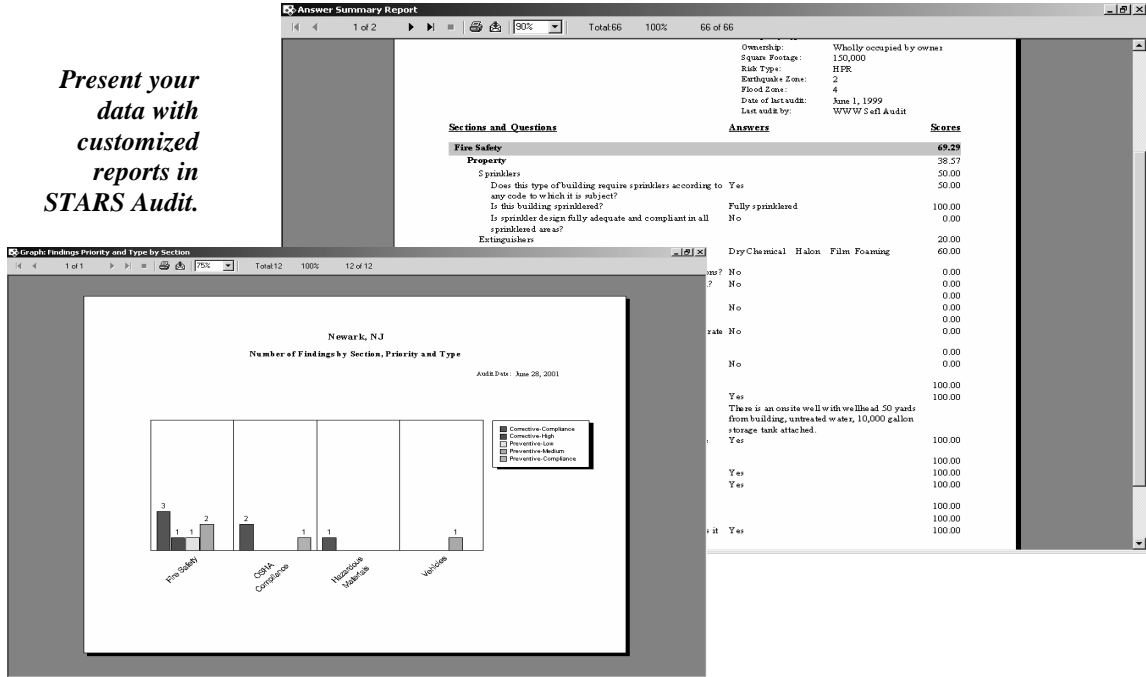

STARS Audit, the latest development in auditing and data gathering software brought to you by CS STARS is a suite of applications designed to automate virtually any audit process, including Property, Environmental, Health and Safety, Facility, Quality, Internal Audit, Claims Audit, ISO and more. STARS Audit allows clients to standardize work processes, establish consistent reporting, track recommendations via the web, and to manage corporate audit data within one integrated, easy-to-use software solution. For more information or to schedule a demonstration please call 1-800-251-0381 or email starsaudit@stpub.com.

Existing client audit protocols can be used within STARS Audit in addition to our 'off the shelf' audits, making the system rich in content & versatile in application. Audits can be performed on the Web, PC or PocketPC.

After completing an audit, STARS Audit generates custom reports instantly to extract pertinent data. These reports can include scoring, executive summaries, finding summaries and more, all of which can be presented graphically, as tables, text or charts and can be made as complex or simple as required.

Present your data with customized reports in STARS Audit.

Upon completion of an audit, and distribution of the pertinent reports, all audit data & findings/recommendations can be uploaded to the browser accessible STARS Audit-Web. STARS Audit-Web provides secure online access to: Audits, Action Plans, Compliance Calendar and Consolidated Analytical Reports.

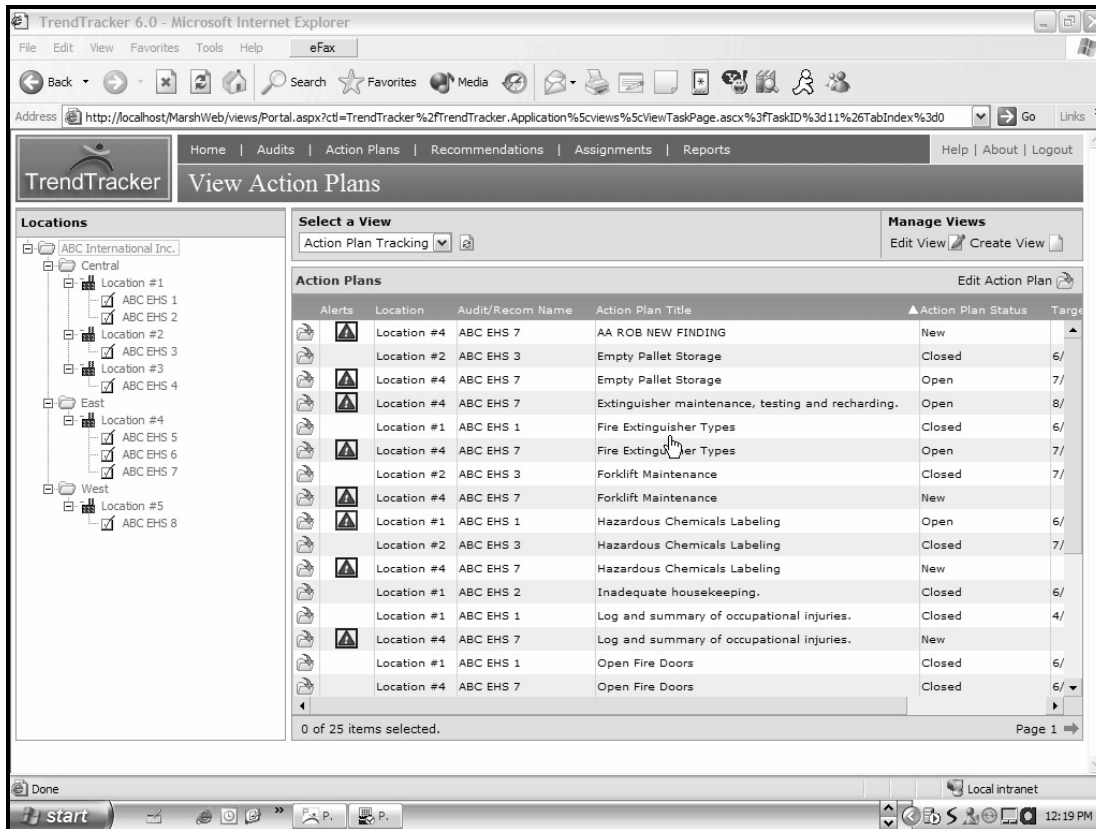

The screenshot shows the 'My TrendTracker' interface for user John Leary. The page includes a navigation menu (Home, Audits, Action Plans, Recommendations, Assignments, Reports, Help, About, Logout) and a welcome message. The main content area is divided into three sections: System Messages, Action Plan Tracking, and Assignments. The Action Plan Tracking section lists various tasks with their status and due dates. The Assignments section lists tasks assigned to the user with their status and due dates.

Title	Status	Date

STARS Audit-Web provides a 'My STARS Audit' home page to each user which displays the most relevant System Messages, Action Plans, Reports, and Calendar Entries.

To access STARS Audit-Web, a user can login through a web browser by entering their unique ID and password, this will provide each user only access to information they have been specifically granted permission to see, while keeping other data secure and out of sight. STARS Audit-Web further simplifies the audit process by sending email notifications automatically when items change status or go past due.

Users can view all action plans for which they are responsible or sort them by folder, location or audit. The system will also alert them via email when items go past due .

STARS Audit-Web also allows users to perform online self-inspections to complement the work of a corporate audit staff.

The Benefits of STARS Audit

- STARS Audit can be used to run any repeatable audit or inspection
- STARS Audit improves the accuracy and efficiency of virtually any audit program by 50%-75%
- STARS Audit helps ensure that an organization maximizes return on its existing auditing investment.
- STARS Audit provides an efficient and effective mechanism to disseminate, track, and close action items.
- STARS Audit centralizes all audit data and provides users with robust reporting and trending capabilities.
